

How to Use Konfirmi with Contact Form 7

Contact Form 7

1. To begin, select the “Contact” tab on the left-hand side in WordPress to create a new Contact Form 7. Select “Add New” to begin.

2. You'll see a draft of the Contact Form 7 ready to be created. First, you'll want to name the form. For this example, we'll call it “Contact Form 7 Konfirmi Test.” Now, let's edit the form fields in the white space below to connect it with your Konfirmi Widget.

The screenshot shows the 'Add New Contact Form' editor. At the top, there is a text input field with the placeholder 'Enter title here', which is circled in red. Below this, there are tabs for 'Form', 'Mail', 'Messages', and 'Additional Settings'. The 'Form' tab is active. The form fields are defined using HTML-like syntax, and this code block is circled in red:

```
<label> Your Name (required)
[text* your-name] </label>

<label> Your Email (required)
[email* your-email] </label>

<label> Subject
[text your-subject] </label>

<label> Your Message
[textarea your-message] </label>

[submit "Send"]
```

At the bottom of the editor, there is a 'Save' button, also circled in red.

You can select from the nine verification fields Konfirmi offers to include in your widget. Four of the nine are required: First Name, Last Name, Phone Number and Email, as well as the Konfirmi Widget and its ID. The remaining optional verification fields include: Country, City, State, Street address and ZIP code.

Required Labels

First Name	Last Name	Email	Phone	Konfirmi ID
<code><label> First Name (required) [text* first_name] </label></code>	<code><label> Last Name (required) [text* last_name] </label></code>	<code><label> Your Email Address (required) [email* email] </label></code>	<code><label> Your Mobile Phone Number (required) [text* phone] </label></code>	Widget ID*** In Konfirmi Dashboard

Optional Labels

Country	City	State	Street	Zip
<code><label> Your Country (required) [text* country] </label></code>	<code><label> Your City (required) [text* city] </label></code>	<code><label> Your State (required) [text* state] </label></code>	<code><label> Your Street Address (required) [text* street] </label></code>	<code><label> Your ZIP code (required) [text* zipcode] </label></code>

For this example, we're going to implement all the available fields Konfirmi offers.

- From the labels provided above, let's see how they would look in the form builder as shown below. Simply copy and paste the field labels above into the page builder's white space circled in red below.

Form

You can edit the form template here. For details, see [Editing Form Template](#).

text email URL tel number date text area drop-down menu checkboxes

```
<label> First Name (required)
  [text* first_name] </label>

<label> Last Name (required)
  [text* last_name] </label>

<label> Your Email Address (required)
  [email* email ] </label>

<label> Your Mobile Phone Number (required)
  [text* phone] </label>

<label> Your Country (required)
  [text* country] </label>

<label> Your City (required)
  [text* city] </label>

<label> Your State (required)
  [text* state] </label>

<label> Your Street Address (required)
  [text* street] </label>

<label> Your ZIP code (required)
  [text* zipcode] </label>

[submit "Send"]
```

4. Now, let's place the Konfirmi widget into the form. Place your cursor where you'd like the widget to appear and select the "Konfirmi" tab in the panel above the form builder. For this example, we're going to place it between the last field, zipcode, and the send button.

The screenshot shows a form builder interface titled "Form". At the top, there is a navigation bar with various widget categories: text, email, URL, tel, number, date, text area, drop-down menu, checkboxes, radio buttons, acceptance, quiz, reCAPTCHA, file, submit, and konfirmi. The "konfirmi" tab is highlighted with a red circle and a red arrow pointing to it. Below the navigation bar, the form template is displayed as a series of HTML-like tags. The tags include labels for "First Name (required)", "Last Name (required)", "Your Email Address (required)", "Your Mobile Phone Number (required)", "Your Country (required)", "Your City (required)", "Your State (required)", "Your Street Address (required)", and "Your ZIP code (required)". A red arrow points to the space between the "Your ZIP code (required)" tag and the "[submit 'Send']" tag, indicating where the Konfirmi widget should be placed.

5. You will have to enter the Konfirmi Widget ID located in the app's dashboard. Enter the widget's ID in the space provided and then "Insert Tag" to complete.

The screenshot shows a dialog box titled "Form-tag Generator: konfirmi". The dialog box contains a text input field labeled "Widget id" with the value "251" entered. A red circle highlights the "Widget id" field. Below the input field, there is a text area containing the generated tag: "[konfirmi id:251]". A red circle highlights this tag. To the right of the tag, there is a blue button labeled "Insert Tag", which is also highlighted with a red circle. At the bottom of the dialog box, there is a small note: "To use the value input through this field in a mail field, you need to insert the corresponding mail-tag (M) into the field on the Mail tab."

6. You'll see the widget container appear in the form builder. Click "Save" to finish.

The form's shortcode will appear once you've saved the form. You will have to place this shortcode in the desired WordPress webpage, which we will do at the end.

Contact form saved.

Contact Form 7 Konfirmi Test

Copy this shortcode and paste it into your post, page, or text widget content:

```
[contact-form-7 id="222" title="Contact Form 7 Konfirmi Test"]
```

Form Mail Messages Additional Settings

Form

You can edit the form template here. For details, see [Editing Form Template](#).

text email URL tel number date text area drop-down menu checkboxes radio buttons acceptance quiz reCAPTCHA file submit

konfirmi

```
<label> Your ZIP code (required)
  [text* zipcode] </label>

[konfirmi id:251]

[submit "Send"]
```

Save

7. Next, you'll need to assign the container to the form. Select the "Konfirmi" tab on the left-hand side in WordPress. You'll see your Konfirmi Widget that you created here. Under "Widget Integrations," click the drop-down arrow and select "Contact Form 7."

Widgets table

Konfirmi-container	Widget Integrations	Widget ID	Data checks
[konfirmi id="251"]	Caldera Forms Contact Form 7 Gravty Forms Caldera Forms WooCommerce	251	15

8. A message will appear notifying you that your container was successfully attached to the form.

9. Lastly, we'll place the copied shortcode generated from the Contact Form 7 we created in the desired WordPress webpage. Place the shortcode in the blank white space as shown below, and click "Update" to complete. A message will appear notifying you that you've updated your page. Click "View Page" to see the form you've created.

10. That's it! You are ready to start verifying your customers using your Konfirmi Widget!

First Name (required)

Last Name (required)

Your Email Address (required)

Your Mobile Phone Number (required)

Your Country (required)
