

How to Use Konfirmi with WooCommerce

WooCommerce

Once you've created your Konfirmi widget, connecting it with WooCommerce is easy and quick to do if you already have the WooCommerce plugin installed. The most important part is to make sure that the WooCommerce feature is enabled when creating your Konfirmi widget.

1. To begin, you must have the "WooCommerce" feature enabled when you created the Konfirmi widget.

The screenshot shows the configuration interface for a "WordPress Contact Form" widget. It contains two sections for integration options:

- WordPress Contact Form:** "Would you like this widget to import information from WordPress contact forms? (We support Caldera Forms, Contact Form 7, Gravity Forms, and Ninja Forms)". The "Yes" radio button is selected.
- WooCommerce:** The heading "WooCommerce" is circled in red. Below it, "Would you like this widget to import information from WooCommerce?". The "Yes" radio button is selected, and a red arrow points to it.

If you do not remember if you enabled the "WooCommerce" integration, simply return to the Konfirmi application's dashboard and click on the pencil next for the widget you created.

You can now edit the widget. Scroll down to the WooCommerce section and enable this feature if it is not already enabled.

WordPress Contact Form

Would you like this widget to import information from WordPress contact forms?
(We support Caldera Forms, Contact Form 7, Gravity Forms, and Ninja Forms)

Yes
 No

WooCommerce

Would you like this widget to import information from WooCommerce?

Yes 
 No

- Next, we'll have to assign the widget to the form type in WordPress. In your WordPress account, select the "Konfirmi" tab on the left side.

Widgets table

Konfirmi-container	Widget Integrations	Widget ID	Data checks
[konfirmi id="270"]	Select	270	1000

- Make sure that you are signed in to your Konfirmi account. If you are not yet signed in, press the "SIGN IN" button on the top right, and sign in to your Konfirmi account.
- Select the dropdown arrow for "Widget Integrations" and then select "WooCommerce."

Widgets table

Konfirmi-container	Widget Integrations	Widget ID	Data checks
[konfirmi id="270"]	<div style="border: 1px solid #ccc; padding: 5px;"> Select ▼ Select Contact Form 7 Ninja Forms Gravity Forms Caldera Forms WooCommerce </div>	270	1000

- A message will appear notifying you that your container was successfully attached to the form.

Container has been successfully attached to the form

Widgets table

Konfirmi-container	Widget Integrations	Widget ID	Data checks
[konfirmi id="270"]	WooCommerce	270	1000

- After enabling the WooCommerce feature when creating the Konfirmi Widget and assigning its container, your Konfirmi widget is ready to use.
- Now, let's check out our WooCommerce form to make sure it's working.
- Go to your WordPress page that hosts your WooCommerce checkout form. Complete the form fields and click "Place order."
